

Mobility

Mobility Lab creating solutions across **6 OS's** | **25+** data sources | **6+** million downloads

Enabling Better Travel

with Domain Driven Technology Management

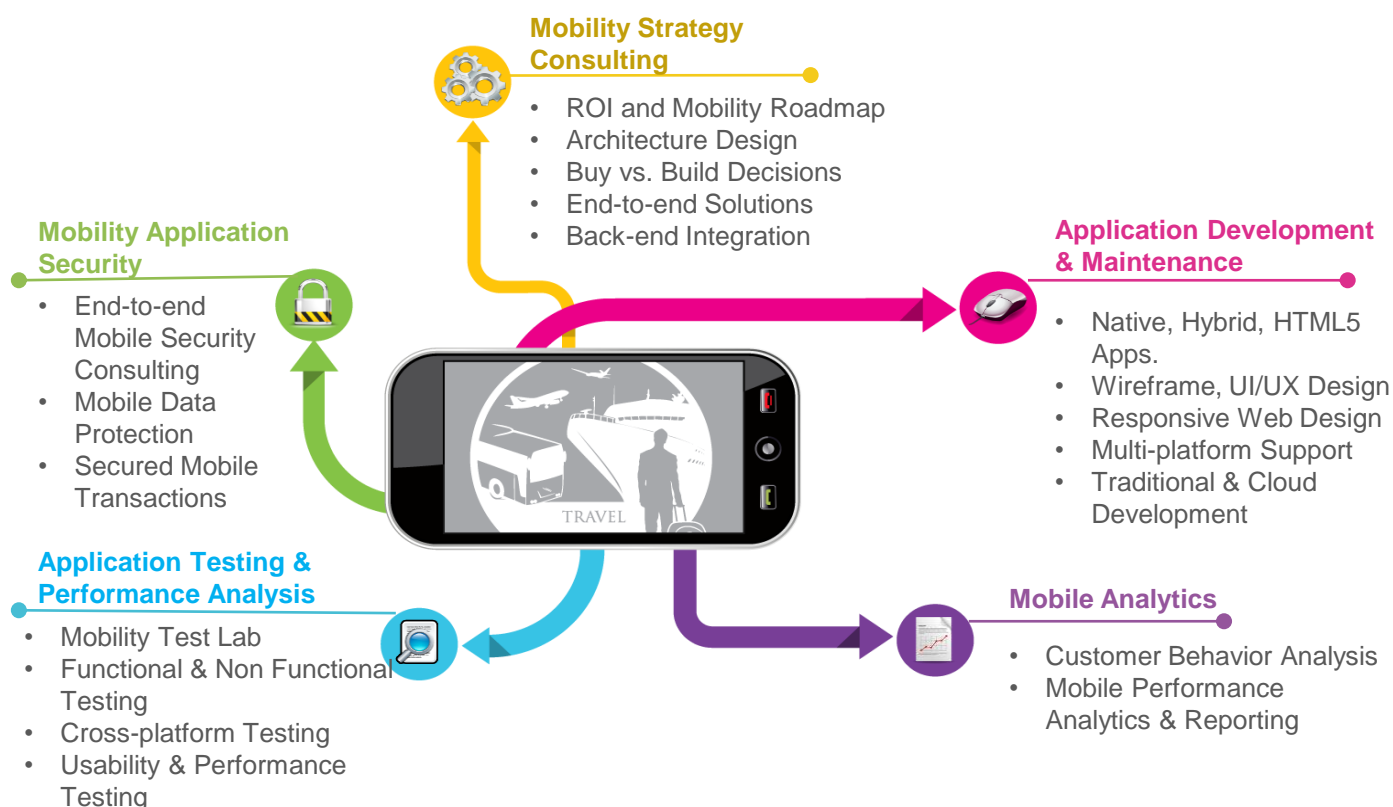

Today, for travelers mobile has become the preferred channel for research, booking and post-travel activities. Thus, offering mobile solutions to travelers has topped the investment list of travel companies.

By combining extensive knowledge of the travel domain, pre-built mobility frameworks and tools & technologies, the IGT's Mobility CoE can help accelerate mobility deployment while minimizing cost.

IGT's Mobility Solutions

IGT provides mobility solutions across the travel industry for airlines, airports, hotels, cargo & cruises.

Why IGT?

- Over **15 years of travel domain** led solution development experience of the travel mobile applications
- **Reduced time-to-market** with reusable repository of UI, testing, security components & pre-built mobility testing framework
- State-of-art **mobility lab** with latest handsets, smart phones, tabs, devices and cloud-based testing support
- Worked with leading airlines, GDS and hotels to provide innovative mobility solutions with over **6 million downloads**
- Helped enable **50% increase in mobile reservations** for a leading Indian LCC with cloud-based mobile app.
